1 Updating the RH520 ExChart Software

1.1 GENERAL

We are pleased to announce that new ExChart software (Version 4.2.1), for the RH520 is now available. This guide describes how to obtain the new software and what new features are supported. If you need assistance at any point in the process, please contact a service representative.

1.2 SOFTWARE UPDATE FEATURES

Version 4.2.1 allows you to correctly display Relative Humidity data directly on display charts.

1.3 PREREQUISITES

To use the new software, you will need:

- An Exttech RH520 Humidity + Temperature Chart Recorder instrument.
- Version 4.2.1 RH520 ExChart installer software files.

1.4 OBTAINING THE INSTALLER FILES

1. Visit <http://www.extech.com> or <https://support.flir.com> (If using the FLIR site, click the **Downloads** tab).
2. Search for the RH520 product page.
3. Click the 'Downloads' tab at the bottom of the RH520 product page.
4. Scroll to the software file and double-click it to begin downloading the software to your PC.
5. Once downloaded and installed on your PC, you can refer to the HELP file within the program or in the otherwise supplied instructional documentation for details on using the software.
6. If you need assistance either in installing or running the software, please contact technical support.
